Relationship Map:

The story background: This is a century that slavery still exists and owning other people is a common thing. However, a slave can be cared by his/her owner.

Since Godart is a suspicious psychopath, he feels so insecure about his skinniness since he is being owned by Lindy who would take Maisey's order. He worries that he would be in a bad

situation since they both like Angel a lot. Thus, Godart finds every single chance to threaten Maisy to let her know she is not able to get Angel anyway. Maisy thus feels unfair and wants to find a way to threaten others to make her feel better. She thus chooses Tedman as a target since her dream girl Angel loves him a lot but he just does not care about her feelings at all. Also, he slave, Lindy, blames a lot about Tedman since he always laughs at his respected research teacher Professor Babette Boggus.
